

Frame for powder storage container

1 unit P3

Swapping, transporting and storing a powder storage container for a plastic laser-sintering system EOSINT P 390 / 395 / 396 when swapping materials, cleaning and servicing

Version 1.5.EN.190704

Technical Specifications

Part No.	1003179	
Name	Frame for powder storage container, 1 unit*	
Manufacturer	Hasenauer & Hesser GmbH	
Intended purpose	Swapping, transporting and storing a powder storage container* for a plastic laser-sintering system EOSINT P 390 / 395 / 396 when swapping materials, cleaning and servicing	
Benefits	<p>Compared to manual handling, prevents risk of muscular-skeletal occupational injuries of workers when swapping materials (pursuant to Section 2, para. 1 German Load Handling Directive - (LasthandhabV)</p> <p>Compact, rugged design</p> <p>Secure, space-saving container storage</p> <p>no damage or contamination of the sensitive dosing rollers</p>	
Suitable lifting equipment	<p>Lift truck for swap frame for the plastic laser-sintering system P 390 / 395 / 396</p> <p>(other versions on request)</p>	
Accessories	<p>Lid for powder storage container (1x)</p> <p>Material indicator (1x)</p>	
Stacking height	Up to 2 frames with a full powder storage container each can be stacked	
Materials	<p>Frame: stainless steel 1.4301</p> <p>Contact surface: Spring steel, 48-50 HRC, abrasion-resistant</p> <p>Lateral guides: Plastic</p>	
Weight	approx. 20 kg	
Load capacity	up to 45 kg (powder storage container + material)	
Dimensions W x H x L	390 mm x 930 mm x 550 mm	

* powder storage container not included in the supplied scope // technical revisions made without notice // may contain editorial and printing errors
