

Lid for swap frame

P1

Uniform cooling of the fabrication job and protection against dirt by covering the swap frame for a plastic laser-sintering system FORMIGA P 100 / 110 / 110 Velocis

Version 1.1.EN.200416

Technical Specifications

Part No.	1040313
Name	Lid for swap frame, P1*
Manufacturer	Hasenauer & Hesser GmbH
Intended purpose	Uniform cooling of the fabrication job and protection against dirt by covering the swap frame for a plastic laser-sintering system FORMIGA P 100 / 110 / 110 Velocis
Benefits	<p>Reduced warping of components</p> <p>Contained oxygen supply, therefore reduced risk of component discoloration</p> <p>The unique handle geometry protects the worker's hands against contacting the potentially hot lid</p> <p>G$\frac{1}{4}$" thread in the lid for convenient nitrogen flooding during the cooling phase</p>
Accessories	<p>optional:</p> <p>Universal wall mount (part No. 1040679) - while the lid is not in use, the universal wall mount can be used to store the lid.</p>
Materials	<p>Lid: Aluminum alloy</p> <p>Gasket: Silicon</p> <p>Handle: PA12 (PA 2200)</p>
Weight	approx. 2 kg
Dimensions W x H x L	247 mm x 295 mm x 70 mm

* swap frame not included in the supplied scope / technical revisions made without notice
