

## Lid for swap frame

P3

Uniform cooling of the fabrication job and protection against dirt by covering the swap frame for a plastic laser-sintering system EOSINT P 390 / 395 / 396

Version 1.4 · EN.230420

## Technical Specifications

Part No.	<b>1003388</b>
Name	<b>Lid for swap frame, P3*</b>
Manufacturer	<b>Hasenauer &amp; Hesser GmbH</b>
Intended purpose	<b>Uniform cooling of the fabrication job and protection against dirt by covering the swap frame for a plastic laser-sintering system EOSINT P 390 / 395 / 396</b>
Benefits	<p><b>Reduced warping of components</b></p> <p><b>Contained oxygen supply, therefore reduced risk of component discoloration</b></p> <p><b>The unique handle geometry protects the worker's hands against contacting the potentially hot lid</b></p> <p><b>Lid can be hung on its handle along the side of the fabrication box</b></p> <p><b>G<math>\frac{1}{4}</math>" thread in the lid for convenient nitrogen flooding during the cooling phase</b></p>
Accessories	<p><b>optional:</b></p> <p><b>Lift truck bracket (part No. 1003389) - while the lid is not in use, the bracket is used to hang the lid on the lift truck of the P3 swap frame.</b></p>
Materials	<p><b>Lid: Aluminum alloy</b></p> <p><b>Gasket: Silicon</b></p> <p><b>Handle: PA12 (PA 2200)</b></p>
Weight	<b>approx. 6 kg</b>
Dimensions W x H x L	<b>410 mm x 130 mm x 430 mm</b>
